Cedrella neck (Spanish Cedar)

640mm scale length

52mm at nut, 62mm at 12th fret

French Polish finish

Recently shown at Royal Greenwich Guitar Festival and West Dean Guitar Festival

£2600

This guitar is built to my plan inspired by Jose Romanillos open harmonic bar design, with some alterations to the strutting detail, but keeping the small body size.

It has full rounded trebles and strong basses, with good balance between the two. The sound is very focussed and clear, with good separation of the voices. It is particularly easy to play, which I aim for anyway, but having the shorter 640mm scale length enhances this aspect.

The tuners are Irving Sloane Hauser style, which are excellent quality. The guitar comes with a Hiscox Pro2 case included in the price. There is no VAT to add.
